C. D. RAMASWAMAIYA,
1st Asst. Comr. and 1st Class Magistrate.

FRENCH ROCKS LOCAL FUND CIRCLE.

Dated 20th May 1903.

1. Notice is hereby given that sealed tenders will be received up to 20th of June 1903 in the office of the President of the Local Fund Boards of the French Rocks Circle, at French Rocks, for the "Construction of a musafirkhana at Malvalli." An approximate estimate of the quantities is given below. These quantities are not guaranteed. The work should be completed by the end of February 1904.

2. The plan, detailed estimate and conditions may be seen at the President's Office at French Rocks, between the hours of 11 A.M. and 5 P.M.

3. The tenders should be accompanied by a statement showing the rates at which the different items specified, will be executed.

4. Each tender must be accompanied by a deposit of Rs. 60 in cash or Government promissory notes, as earnest money and be superscribed "Tender for constructing musafirkhana at Malvalli" in default of which, tenders will be rejected.

5. Within eight days of the acceptance of the tender, the successful competitor will be required to execute the usual contract bond, in default of which, his tender will be considered cancelled and his earnest money forfeited.

6. The name of the successful competitor whose tender will have been accepted will be posted on the notice board in the President's Office in due course. No enquiries regarding the acceptance or rejection of a tender will receive any reply.

7. On the acceptance of one of the tenders the earnest money on rejected tenders will be returned.

N. VENKATA RAO, *President.*

HESSARGHATTA WATER-SUPPLY DIVISION.

1. Notice is hereby given that sealed tenders will be received at the Executive Engineer's Office, Hessarghatta Water-supply Division, up to the 30th June 1903, for supplying 5,000 tons of fuel, casuarina or jungle, for the use of the Pumping Station at Bethamangala, Kolar District, as per specification in para 8.

2. Tenders should be submitted on printed forms which may be obtained from the Executive Engineer.

3. Each tender should be accompanied by a deposit of Rs. 1,000 in cash or in Government pro-notes as earnest money, and be subscribed "Tenders for supplying $\frac{\text{casuarina}}{\text{jungle}}$ fuel to the Pumping Station at Bethamangala."

4. The final acceptance of any tender will rest with the Superintending Engineer, who does not bind himself to accept the lowest or any tender or to assign any reason whatever for the rejection of any tender.

5. Within eight days of the acceptance of the tender, the successful competitor will be required to execute the usual contract bond. In default of which, his tender will be considered cancelled and his earnest money will be forfeited.

6. The name of the successful competitor whose tender has been accepted, will be posted on the notice board in the Executive Engineer's Office in due course. No enquiries regarding the acceptance or rejection of a tender will receive any reply.

7. On acceptance of one of the tenders, the earnest money on rejected tenders will be returned.

Specification.

8. The wood to be in straight lengths. The maximum and minimum dimensions which will be accepted are given below :—

Length.		*Thickness.*	
Maximum.	Minimum.	Maximum.	Minimum.
24″	18″	8″	3″

The billets are to be sawn to lengths, not chopped. Wood above 7″ diameter should be split before they are built into stacks. The wood to be stacked by the contractor in the portions approved by the Executive Engineer or his representatives.

Stacks must be of rectangular shape. The sides being vertical and straight and the tops level, the wood must be laid evenly straight and close, the pieces composing the walls must be laid at right angle to the direction of such walls having first been sawn to an uniform length as above; the interior of the stacks must be packed as closely as possible, the pieces being regularly laid with their lengths all in one direction, which leave no vacant space.

The stacks to be built of such dimensions that the cubical measurement of each is a multiple of 68 cft.

17′ × 8′ × 5′ = 680 cft. = 10 tons.
17′ × 16′ × 5′ = 1,360 cft. = 20 tons.
34′ × 20′ × 5′ = 3,400 cft. = 50 tons.

Sixty-eight (68) cft. of closely hacked wood will be accepted as equivalent to one ton.

The Executive Engineer or his representatives will inspect the wood as it is being stacked and shall have power to reject any pieces that are hollow, rotten, crooked or otherwise unsuitable for fuel for engines; he will also satisfy himself that the pieces are in accordance with the dimensions specified above and that the stacks are built as required. He shall also have power to reject any stacks which do not in all respects comply with the terms of this specification.
